RLMCA233/WEB PROGRAMMING LAB

TITLE:	CSS
OBJECTIVE:	CSS (inline/external styles, positioning)
LAST DATE:	11.10.2018

1. Create three different headings h1, h2 and h3 with different foreground and background colors. Also use different character and word spacing for the text in the headings. (Use Inline style)
2. Create a .css file and link it with a web document that will display two paragraphs with different line spacing
3. Display three images in three different coordinates using absolute positioning.
4. Create a <div> tag and position it using absolute positioning. A heading tag can be created in the <div> tag and position it using relative positioning.
5. Implement z-index positioning with an image, paragraph and heading
